

SANTIAGO TOLOZA

FULL STACK DEVELOPER

WORK EXPERIENCE

QNBD - TNBD, Texas, USA - Full Stack

December 2024 - Present

Developed a front-end web application using Next.js 15.1.2 and Tailwind CSS to ensure a responsive and highly efficient design. Implemented reusable components and optimized application performance to enhance user experience. Utilized modern development and testing tools to ensure seamless API integration and optimal site functionality

Genova- Neuquén - Front End React

September 2024 - Present

Developing a React application using Material UI and Chakra UI to manage a petroleum company's vehicle fleet. Responsible for authentication and authorization using JWT, as well as exporting reports in PDF and Excel formats to facilitate data management. Utilize Postman to integrate and test APIs, optimizing usability and efficiency in vehicle management. Currently developing a real-time monitoring system to improve fleet tracking and control.

Medeak México - Full Stack web

December 2022 - October 2024

Full Stack Developer with experience in technologies such as Figma, Prisma ORM, Next.js, MySQL, MUI, Firebase, and Google Cloud Identity Platform for authentication and authorization. Developed an educational application, leading the front-end development for over 5,000 elementary, middle, and high school students, optimizing usability and user experience within the educational process. In this project, implemented functionalities that allow users to view multimedia content, along with a role-based system that enables certain users to add, edit, and delete multimedia files. Additionally, developed a QR code generation system that directly links to multimedia resources, facilitating access and distribution of educational materials.

PROFILE

I am a Full Stack (MERN) developer with more than three and a half years of proven experience.

ADDITIONAL EXPERIENCE

No-Country - Full Stack web

August 2021 - December 2022

Developed, as part of an 8-person team, a web application for soccer field rentals, acting as both Full Stack Developer and Scrum Master.

Implemented technologies such as Next.js, MongoDB, Prisma, SASS, and management tools like Trello and GitHub. Additionally, integrated payment gateways such as Stripe and MercadoPago.

Prixma - Front End Developer

October 2020 - August 2021

Participated in the design and development of interactive and responsive user interfaces, implementing layouts provided by the design team. Collaborated with designers and back-end developers to ensure consistency and functionality, optimizing the performance and speed of web applications. Also integrated third-party APIs to enhance functionality and actively participated in the improvement and maintenance of existing applications.
